BEDROOM

Bed Cradle -\$7 / week

- The bed cradle is designed to keep bed linen off sensitive areas of the patient's lower leg or feet by creating clearance between bed linen and the mattress
- The lower frame slides underneath the mattress, securing the cradle to the bed, while the upper frame is positioned horizontally over the lower limbs
- Bedding is then placed over the frame to remove any weight or pressure from the sensitive limbs below
- Height adjustable frame allows the user to customise the space between mattress surface and bedding
- Powder Coated Mild Steel Construction
