

Revolution Chair

The revolution chair incorporates a unique, **patented "swivel-slide" technology** allowing easy access to the chair and to the table *without moving its legs*.

While the chair legs are stationary, the seat turns to receive the user and returns to face the table. It then glides forward to position the user at a comfortable distance from the table edge.

The lock/release mechanism allows the seat to gently slide back from the table so it can swivel left or right for easy stable exit.

The **Revolution Chair** is the only chair of its kind in the world, patented and sold only through your local dealer.

- No more having to push residents or patients up to the table.
- People are able to seat themselves without requiring assistance.
- Provides greater independence for users.
- The chair is safe; no wheels, supporting up to 120kg.
- Saves money; less time sitting residents for meals.
- Fewer Workcover claims from staff.

Finishes

- Frame are Satin Black or Silver Pearl.
- Fabrics available in Terra Nova Neo colors.
- Other finishes available on request.

Dimensions

seat width:	450mm	overall width:	580mm
